Species	Date(s) Observed	Spawning	Rearing	Migration
Pink Salmon	27 August	200 plus		
Pink Salmon	27 August	200 plus		
Pink Salmon	27 August	200 plus		

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

These three creeks are Located in Little Bay at the southern tip of Knight Island
The streams at low water are separated from the bay creating a barrier for migration
at low water. There were also several carcasses observed indicating spawning present.
This was an aerial survey. No foot survey was conducted.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
